

# Rehydrate your landscape to improve productivity

**Field Day:**  
**16 November**

3pm, with BBQ

## Catch and cycle water with natural infrastructure & better farm systems

Join this bold new program presented by Mulloon Institute. This is a rare chance to be mentored by landscape planners with hydrological expertise, gain experience through on-ground projects and tailor strategies to your property.

**Field Day:** Learn how to read water processes to interpret landscape health. Discover a range of strategies for optimising water cycling and landscape function.

**Bootcamp:** Gain hands-on skills to catch water and build landscape resilience. Apply science-based tools and tactics to prepare your property for climate variability.

**Mentoring, peer-learning & on-ground projects:** ongoing in 2024. *This heavily discounted program is worth \$5,000 per person!*

**Mulloon Institute** is a leading research and education organisation helping to build resilient regional communities by supporting the long-term, sustainable growth of Australian agriculture.

### Presenters:

**Neil Cupples**  
Senior Landscape Designer  
Mulloon Institute

**Louise Duff**  
Extension & Outreach Coordinator  
Mulloon Institute
